Personal Profile

I am a motivated and highly driven Computer Science graduate who enjoys the thrill of solving new and exciting challenges. I have recently completed my degree at the University of Kent. I am now working in a competitive environment where I am gaining excellent communication skills and more effective skills to work in a team environment.

Education and Qualifications

July 2015: University of Kent (BSc Computer Science) - Classification 2:2

Recent Modules Include: Web Development: I am able to express my creativity and bring my own ideas to life. My recent project involved using an MVC (Model Control View) framework to create a blogging website.

Aug 2011: St Simon Stock Catholic School

A-Levels: Maths - B; English - C; CISCO(CCNA) Level 3 Diploma.

GCSE's: Maths - B; Science - AA; English - AB; Electronics - B; Geography - B; Religious Education - B; History - C; I.C.T - C

Work Experience

September 2016 – Current: Supply Chain Assistant – Q'Straint

I am currently working as a supply chain administrator. My main roles include ensuring that production is as prepared as possible to meet future demand. Alongside this, I am also in charge of the purchasing side of the business and as a result have gained skills in both production and purchasing. My strong IT skills are also utilised to bolster the creation of reports and streamlining other existing systems to increase productivity in the company.

July 2015 – September 2015: Desert Chef – Beefeater Restaurant (Whitbread PLC)

After finishing University, I started a part-time job working at a restaurant and have learnt a great deal from the opportunity. I have become more organised and work efficient under great amounts of workload handling multiple orders by many different people each requiring a finite amount of time to be completed.

April 2015 - May 2015: IT Consultant - Edgar and Co

During my time at school I was able to work on some IT based projects. Some of these included, Invoice handling(excel) and an Automatic Schedule/Organiser also based on excel. I assessed the issues at hand, where there was a lot of time wasted manually entering values into excel spreadsheets. I suggested an automated system based on heavy macro usage which was taken well and has drastically reduced the amount of time it takes to have their spreadsheets generated with the relevant data.

July 2012 - September 2012: Health Care Assistant - Basildon Hospital:

Over the summer period in 2012, I worked as a part-time care assistant in Basildon Hospital. I was able to apply my time management and organisational skills, as there was very little room for failure when dealing with vulnerable patients(dementia). I also gained more confidence and enhanced my social skills as I developed a rapport with the patients.

Languages, Skills and Frameworks

- Languages I am comfortable with:
PHP, MySQL, HTML, Java, Python, JavaScript
- Designed and produced a multi-player online game using an Object Oriented language written in C (BYOND)
- Designed a blogging website using an MVC framework (Code Igniter)

Personal attributes

- I am self-motivated, can work independently and act on my own initiative.
- I am a fast learner and can quickly adapt to working in complex environments and challenges.
- I have very flexible working hours.
- I am goal oriented and maintain a positive attitude even in challenging situations.

Interests and Activities

Technology: I am very interested in computers and most technological gadgets and have a natural flair and love for dealing with them.

Reading: I am an avid reader and I am very knowledgeable on most fiction works as a result. I am particularly interested in Science fiction works by Dan Brown, Anthony Horowitz and other similar authors in this genre.

Sports: I love physical sports and played for the Maidstone Rugby under 18s team. In school, I captained the year 11 rugby and in University, I played as a Flanker for the 1st team.
